Either party would fight shy of getting mixed up in such a matter. It will be over and out no figure in November, I believe from the outlook."

The figures showing the business done by the post office department in money orders during the last fiscal year are eye openers. The money orders issued amounted to \$255,670,027.98, and the money-orders paid to \$219,120,285 82, a total of \$504,790,313.80, being an increase over the previous year of \$62,306,949.58, or more than 14 per cent. This broke all records of the postal service both in the amount of increase and in the percentage of increase and tells its own story of the prosperity of our people.

There are 3,000 mayors in France and all have been invited by the Paris municipality to the fetes it is giving on the 22nd and 23rd of the month in celebration of the Exposition. One would hardly have thought that any of the mayors would refuse to attend so purely festal and non-political a gathering, but refuse several of there do, and in no very consteous terms. The reason is that the last Paris municipal elections resulted in a large nationalist majority, and among the majority, some of the choicest demagognes the Paris working classes can produce. The French provincial mayor, as a rule, is a level-headed if somewhat rustic person, who sees in an acceptance of the invitation an act of disloyalty to "Liberty, Equality, and Fraternity" as by law and Loubet established. The two most important towns whose mayors have retused are, so far, Lyons and Marseilles. The mayor of the latter excused himself on the ground that the recent strikes left him so sad that he has no spirit for the gaitles the Paris municipality promises, and will ma doubt brilliantly provide.
